Summary

Experienced professional with a strong background in backend and fullstack development, boasting 4 years of industry experience. Skilled in PHP with Laravel & Codeigniter framework, Javascript & Typescript with Node.js, Express.js, and Vue.js, Golang with Fiber & Gin framework, SQL, and Automation Testing with Selenium & Cypress Framework. I have successfully developed and deployed robust web applications. Additionally, I have hands-on experience with C# with .NET framework, React.js, Next.js, and NoSQL.

I am enthusiastic about Backend Development and Fullstack Development, and I am always eager to learn new things. I am confident that I have the skills and experience that you are looking for in a Backend Developer or Fullstack Developer.

Experience

Full Stack Developer

C CHANNEL Indonesia

Sep 2022 - Present (1 year 6 months)

As a Fulltime Fullstack Developer at C Channel Indonesia.

My Responsibilities:

- Developed systems using PHP with the Laravel framework, Javascript and Typescript with the Vue JS framework, and utilized MySQL for the database.
- Developed APIs using GraphQL for mobile application.
- Integrated with third-party platforms such as META (Facebook & Instagram), TikTok, and Payment Gateway through API connections.

Software Developer

PT Arah Environmental Indonesia

Aug 2022 - Mar 2023 (8 months)

As a Freelance Software Developer at PT Arah Environmental Indonesia.

My Responsibilities:

- Developed internal system using PHP with the Laravel and Codeigniter framework, Typescript with the Node JS(Express JS) framework, and PostgreSQL for the database.
- Developed Automation Testing using Selenium Framework.
- Integrated with APIs from E-Materai Indonesia, Digital Signature, and Faktur Pajak for E-Invoice.

Technical Lead Developer

Telkom Indonesia

Dec 2021 - Dec 2022 (1 year 1 month)

As a Fulltime Technical Lead Developer at Tribe Pesantren Go Digital.

My Responsibilities:

- Designed and created an ecosystem or work habits for the team I led, including conducting Daily Sprints every morning, Weekly Sprints at the end of each workday, and Monthly Reviews to assess individual progress and tasks.
- Created template documents for Product Requirements (PRD) and Functional Requirements Specification (FRS) for Project/Product Managers.
- Analyzed and made technical decisions regarding architecture, programming languages, and tools. Implemented Git Feature Workflow and various development code patterns, such as the Repository Pattern.
- Analyzed and discussed project/feature timelines in collaboration with Project/Product Development, Developers, and QA.
- Contributed to code development and conducted code reviews according to agreed-upon coding standards.

Fullstack Developer

Telkom Indonesia

Jun 2021 - Dec 2022 (1 year 7 months)

As a Fulltime Fullstack Developer at Tribe Pesantren Go Digital.

My Responsibilities:

- Designed and developed an system using Golang with the Gin framework & Fiber framework, PHP with Laravel & Lumen frameworks, Javascript and Typescript with the Next JS Node JS, Express JS frameworks, and MySQL for the database.
- Developed Automation Testing using Selenium Framework and Cypress Framework.
- Developed Single Sign-On (SSO) Authentication, allowing users to access other applications without the need for reauthentication.
- Developed Automation Testing using Selenium Framework and Cypress Framework.
- Deployed to a Ubuntu-based VPS server and cPanel.

Software Engineer

Nawatech

Jan 2022 - Jun 2022 (6 months)

As a Part-time .NET Programmer.

My Responsibilities :

- Developed internal system using Javascript, jQuery, C#, .NET and SQL Server for the database.
- Using method agile.

Information Technology Programmer

LPKN Training Center

Sep 2020 - Sep 2021 (1 year 1 month)

As a Fulltime IT Programmer at LPKN Training Center.

My Responsibilities:

- Developed internal system using PHP with the Laravel framework, Javascript with the React JS & Vue JS frameworks, Socket IO, and MySQL for Databases. With Domain Driven Design pattern.

- Developed external several systems, namely Vendor Management, Rencana Umum Pengadaan, and E-Tender, for use by Jasamarga company.
- Deployed to a Ubuntu-based VPS server and cPanel.

Bootcamp Sekolah Programmer

Aug 2019 - Nov 2019 (4 months)

Experience List

- Learn programming language (PHP, Python, CSS, and etc)
- Learn basic computers
- Learn Framework Laravel
- Creating the Final Project
- and others related to work

Education

Sekolah Tinggi Teknologi Terpadu Nurul Fikri

Bachelor's degree, Teknik Komputer

Sep 2021 - Sep 2024

Computer Science (Teknik Informatika)

Licenses & Certifications

MikroTik Certified Network Associate (MTCNA) - MikroTik

Issued Oct 2018 - Expires Oct 2021

1810NA1530

Bootcamp Sekolah Programmer

679/S/NF COM/XI/2017

Skills

PHP • Laravel • JavaScript • TypeScript • Node.js • Vue.js • Go (Programming Language) • Test Automation • SQL • Git

PORTFOLIO

Zulkifli Raihan

Fullstack Developer

Projects (Latest – Oldest)

1. IRM Lemon APP (C Channel Indonesia)

IRM Lemon is a platform developed by PT. C Channel Indonesia that facilitates brands in promoting their products through influencers who have partnered with C Channel Indonesia. It also allows influencers to engage with brands and endorse products online. Essentially, this application is quite similar to Neo Lemon & KOL Lemon App, but it incorporates several new features unique to IRM. And The technology stack used in the development of Neo Lemon includes :

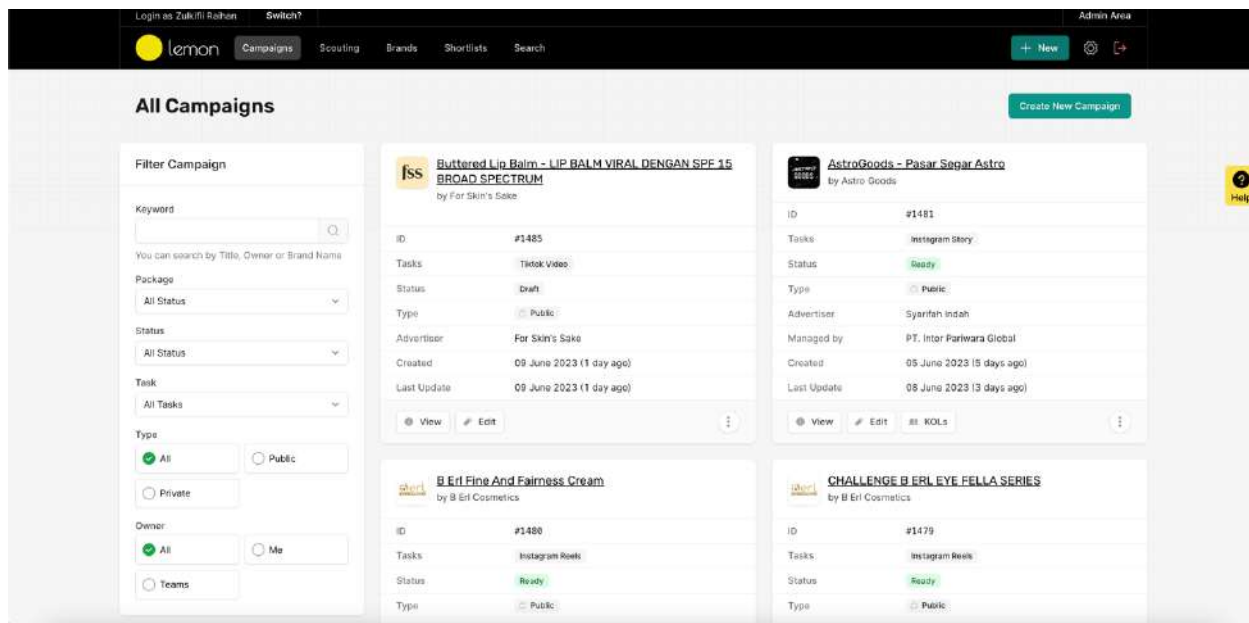

- Back-end: PHP, Laravel
- Front-end: Javascript & Typescript, Vue JS
- Database: MySQL
- Integrations: API Meta (Facebook & Instagram), API Tiktok, Payment Gateway, GraphQL, and others

2. Neo Lemon APP (C Channel Indonesia)

Neo Lemon is a platform developed by **PT. C Channel Indonesia** that helps brands to advertise their products through influencers who have partnered with C Channel Indonesia. The platform offers various ad display packages that can be customized according to the brand's needs, from ad display in video content to promotion through social media. The technology stack used in the development of Neo Lemon includes :

- Back-end: PHP, Laravel
- Front-end: Javascript & Typescript, Vue JS
- Database: MySQL
- Integrations: API Meta (Facebook & Instagram), API Tiktok, Payment Gateway, GraphQL, and others

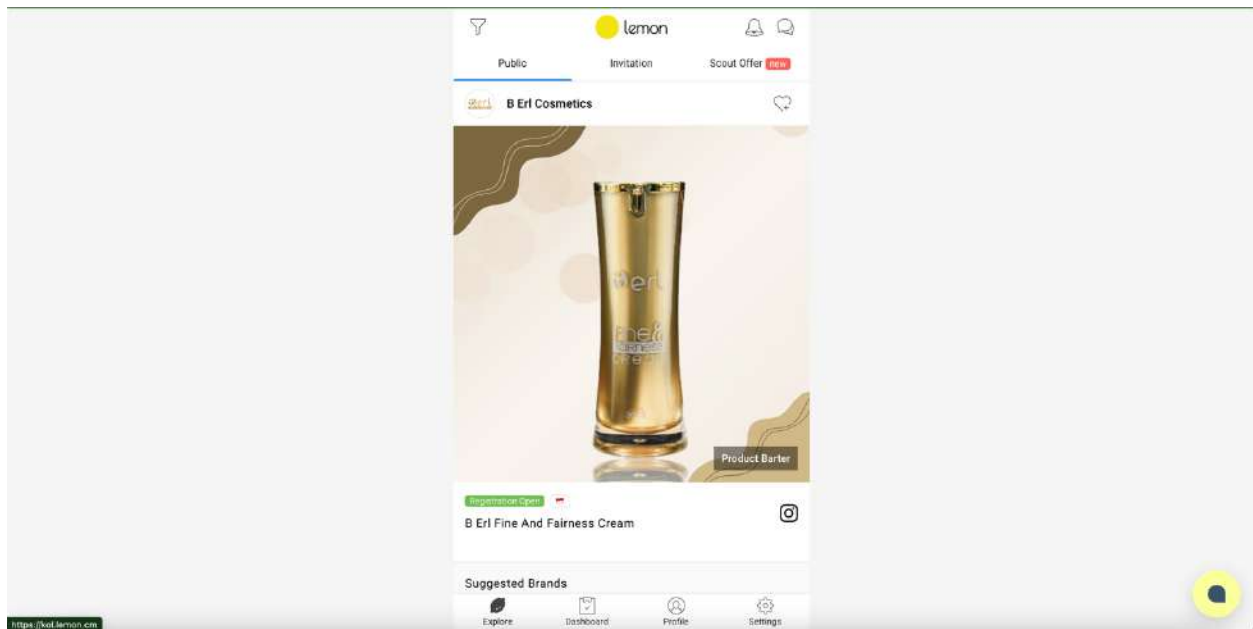

3. KOL Lemon (C Channel Indonesia)

KOL Lemon is an application that enables influencers to connect with brands and promote products online. The app is developed by **PT. C Channel Indonesia**, a health and fitness company in Indonesia. KOL Lemon makes it easier for influencers to manage their promotional campaigns and provides access to various analytical data that can help them optimize their campaign performance.

The technology stack used in the development of KOL Lemon includes :

- Front-end: Javascript & Typescript, Vue JS PWA

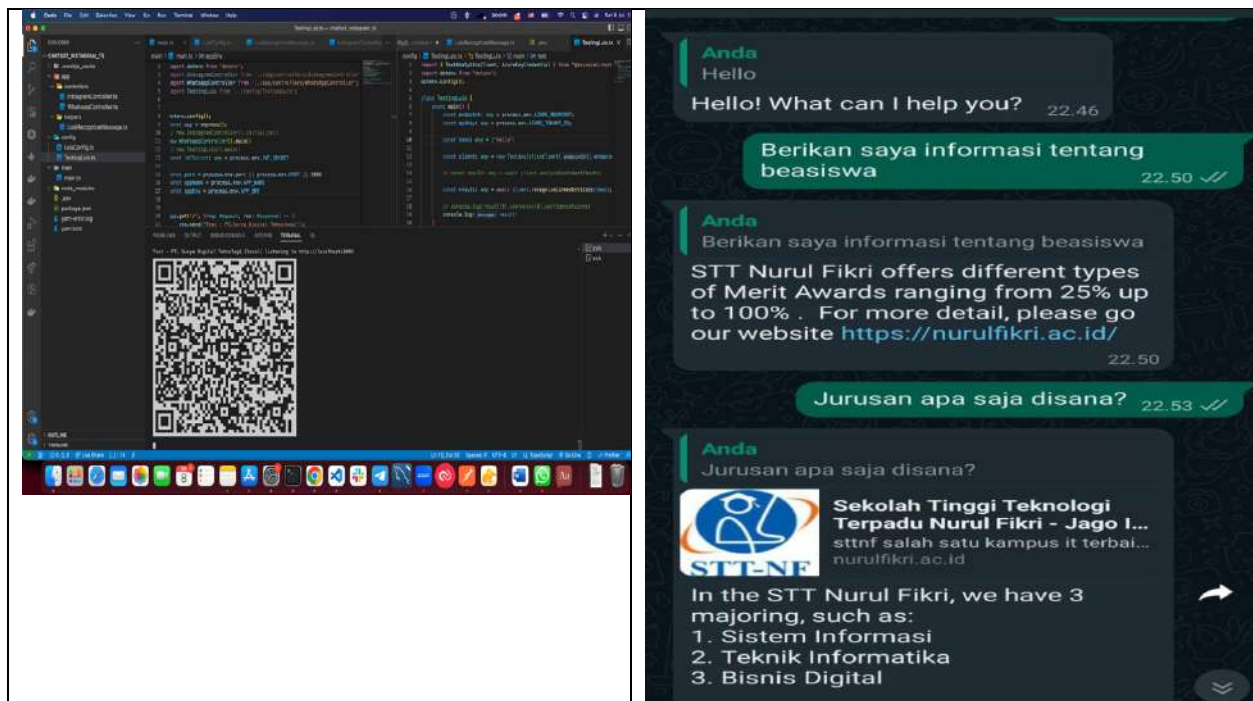

4. Chatbot WhatsApp

The Whatsapp Chatbot is an intelligent chatbot platform integrated with Whatsapp to assist admins in efficiently responding to direct messages (DMs) without the need to be online 24/7. This chatbot is equipped with Azure LUIS AI, allowing it to automatically understand and match incoming messages to specific categories or criteria to generate appropriate responses.

The technology stack used in the development of Pesantren Hub includes :

- Back-end: Typescript, Node JS (Express JS)
- Integration: Whatsapp Package API, Azure LUIS AI

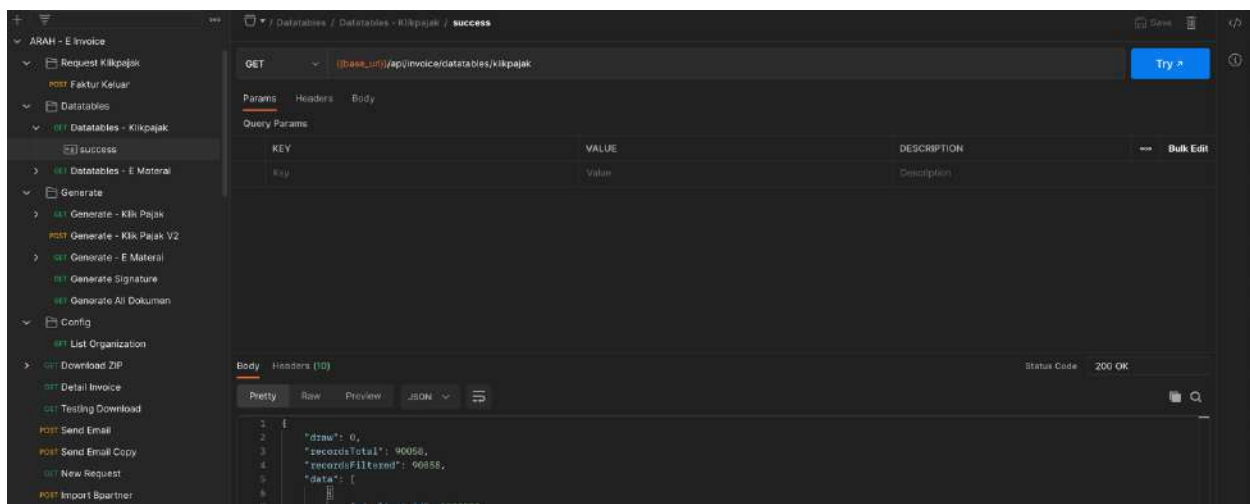

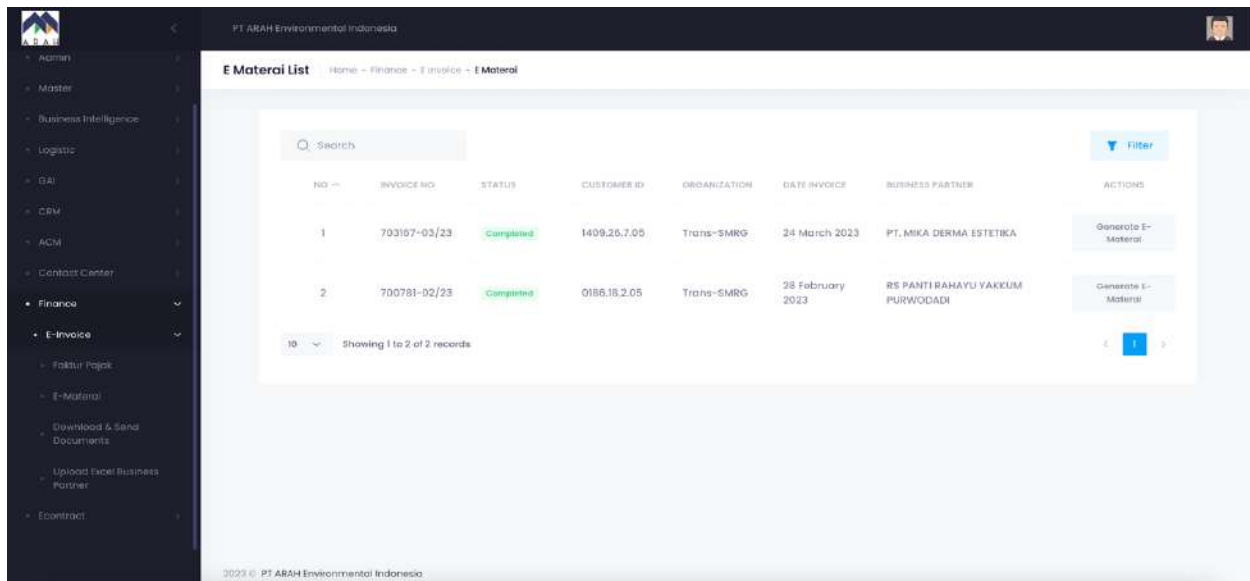

5. E-Invoice (PT. Arah Environmental Indonesia)

E-Invoice is an electronic invoicing application developed for PT. Arah Environmental Indonesia's internal use. The app is designed to simplify the process of creating and managing invoices electronically. E-Invoice comes with features such as downloading invoices in ZIP or PDF and sending emails to customers along with the e-invoice file to facilitate the payment process. With E-Invoice, businesses can streamline their invoicing processes and reduce the need for manual invoicing.

The technology stack used in the development of E-Invoice includes :

- Back-end: PHP, Laravel, Typescript, Node JS (Express JS)
- Front-end: PHP, CodeIgniter (CI), Javascript, JQuery
- Database: PostgreSQL
- Integration: API E-Materai, API Faktur Pajak, and others.

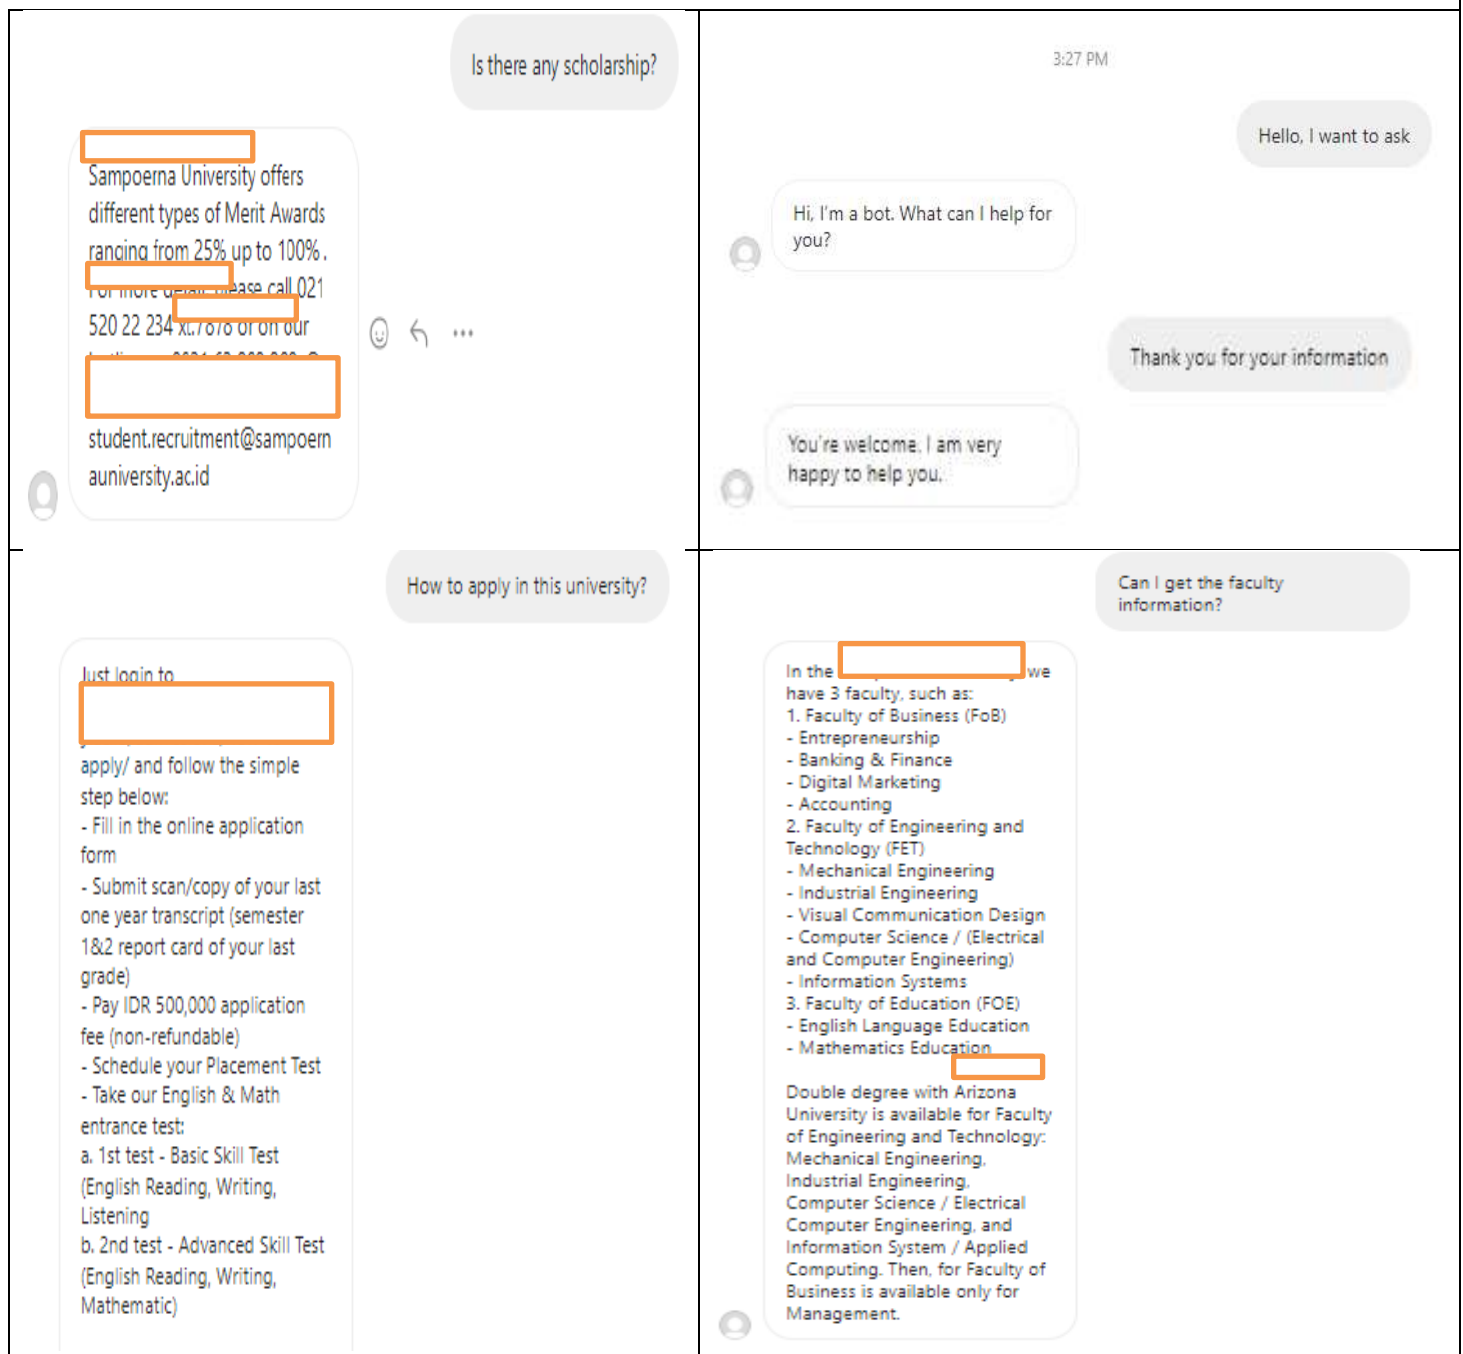

6. Chatbot Instagram

The Instagram Chatbot is an intelligent chatbot platform integrated with Instagram to assist admins in efficiently responding to direct messages (DMs) without the need to be online 24/7. This chatbot is equipped with Azure LUIS AI, allowing it to automatically understand and match incoming messages to specific categories or criteria to generate appropriate responses.

The technology stack used in the development of Pesantren Hub includes :

- Back-end: Javascript, Node JS (Express JS)
- Integration: Instagram Package API, Azure LUIS AI

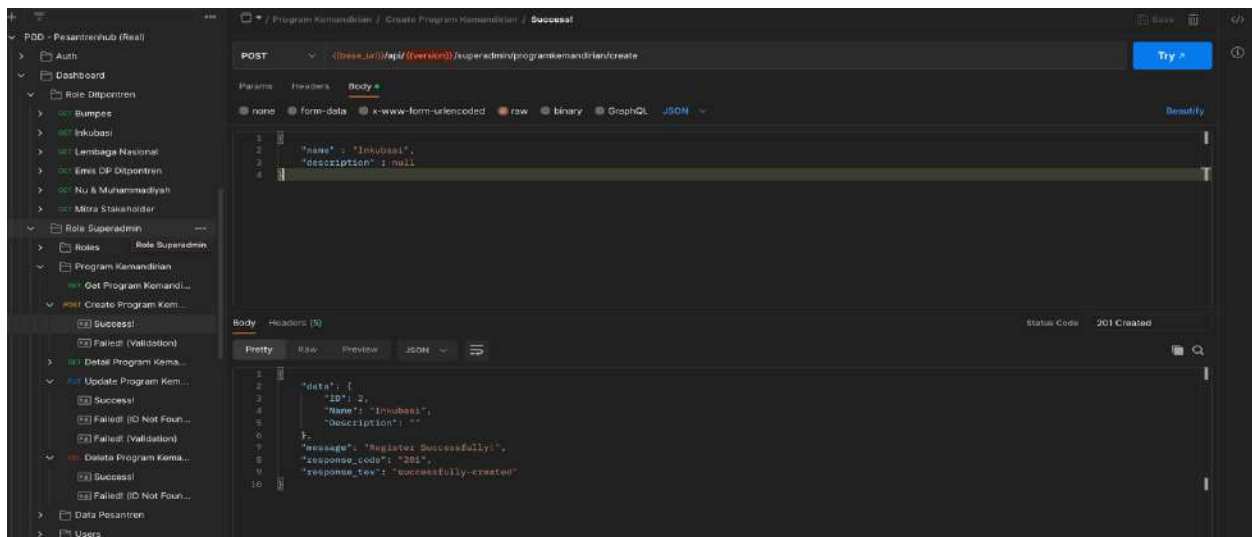

7. Pesantren Hub (Telkom Indonesia)

Pesantren Hub is a powerful backend application developed to provide a centralized hub for all pesantren-related information. The app is designed to be a reliable and efficient solution for users to find the information they need for each pesantren, making it a central source for pesantren-related information.

To achieve this, Pesantren Hub is integrated with various databases, including the Ministry of Religious Affairs' and Telkom Indonesia's databases, enabling it to map and locate pesantren throughout Indonesia. This integration allows the app to provide complete and accurate pesantren information for users.

The technology stack used in the development of Pesantren Hub includes :

- Back-end: Go, Fiber
- Database: PostgreSQL
- Integration: Database Ministry of Religious Affairs Indonesia

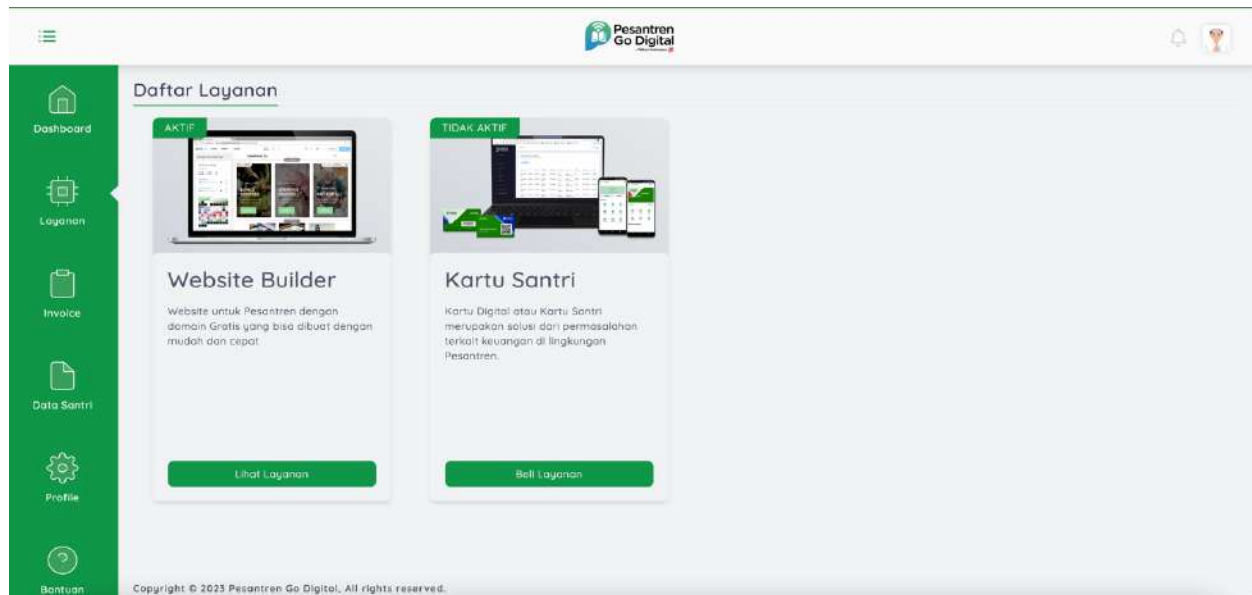

8. Store PGD (Telkom Indonesia)

Store PGD is a platform developed by Telkom Indonesia for pesantren (Islamic boarding schools) that face various challenges. This platform serves as a solution to address their specific issues. For example, it provides Internet connectivity solutions through services like Indihome or Orbit.

The technology stack used in the development of Store PGD includes :

- Back-end: PHP, Laravel
- Frond-end: Javascript, JQuery, Laravel
- Database: MySQL

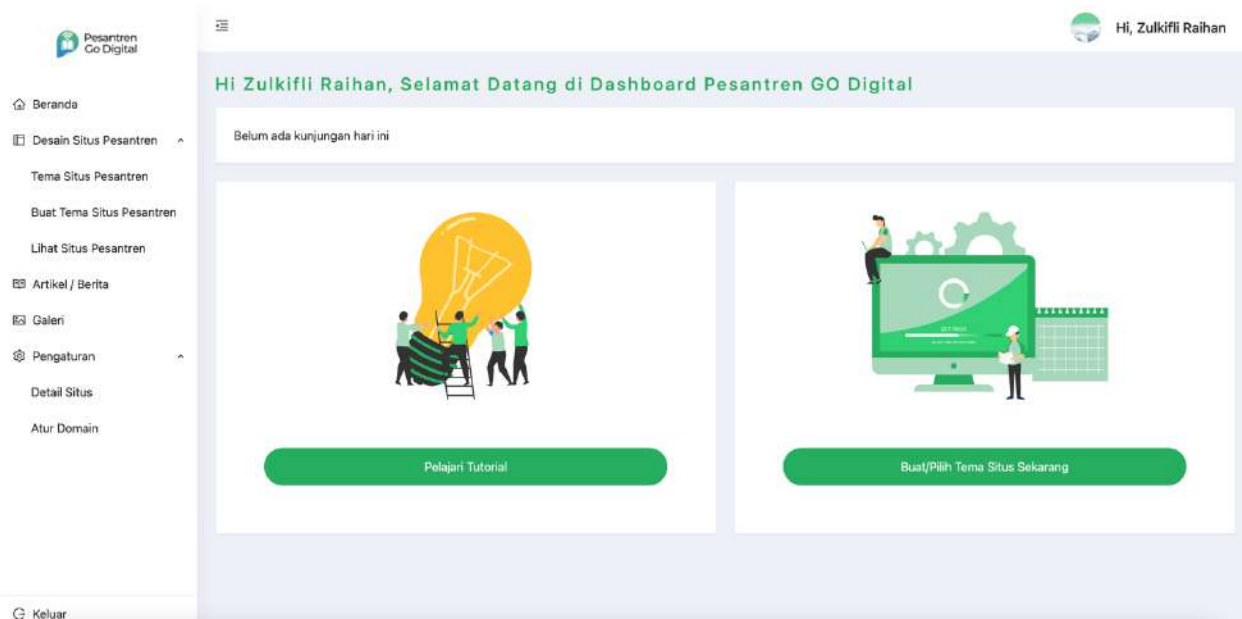

9. Website Builder (Telkom Indonesia)

Website Builder is a platform provided by Telkom Indonesia to offer a solution for pesantren (Islamic boarding schools) to easily create their own websites without the need for coding. This project can be considered as a simplified version of WordPress, enabling users to quickly build websites without hassle.

The technology stack used in the development of Website Builder includes :

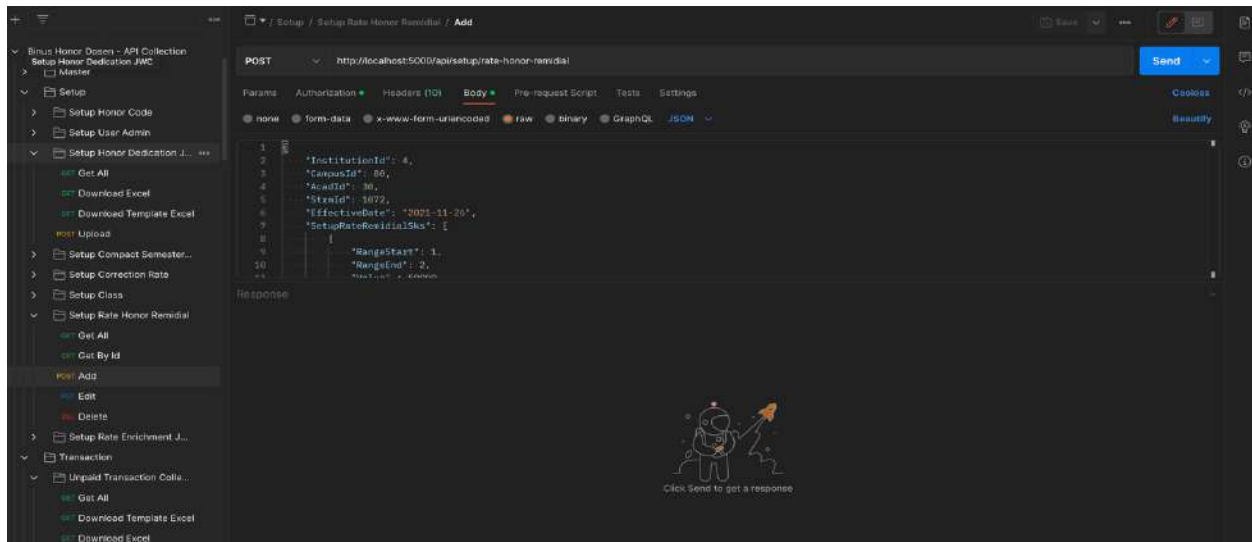

- Back-end: PHP, Laravel
- Frond-end: Javascript, Next JS
- Database: MySQL

10. Binus Honor

Binus Honor is an application developed by Nawatech for Binus University. This application is specifically designed to manage the honorarium of the university's lecturers, the lecturer attendance system, and other internal aspects. Through Binus Honor, lecturers can easily submit honorarium requests, manage attendance, and access information regarding honor payments. The application accelerates administrative processes, enhances transparency, and improves efficiency in managing lecturer honorarium at Binus University. The technology stack used in the development of Binus Honor includes :

- Back-end: C#, .NET Core
- Frond-end: Javascript, JQuery
- Database: MySQL
- Integration : API Internal Binus University

11. Daftar Rekanan Jasamarga / Jasamarga Contractor List - DRJM (LPKN Training Center)

Daftar Rekanan Jasamarga / Jasamarga Contractor List (DRJM) is a project developed by developed by LPKN Training Center for Jasamarga to create and manage a database of contractors or business partners collaborating with the company. DRJM serves as a system that records and manages information related to contractors, such as company data, qualifications, work experience, and their availability to participate in Jasamarga projects. This system helps Jasamarga in selecting and establishing effective partnerships with high-quality contractors. The technology stack used in the development of DRJM includes :

- Back-end: PHP, Laravel
- Frond-end: Javascript, JQuery, Laravel
- Database: MySQL

12. Rencana Umum Pengadaan – RUP (LPKN Training Center)

The General Procurement Plan (RUP) is a project developed by LPKN Training Center for Jasamarga. The project aims to implement an e-procurement system for Jasamarga, providing an efficient and transparent process for the procurement of goods and services. Enabling the vendors to access tender information, submit bids, and facilitate the entire procurement process online. The technology stack used in the development of RUP includes :

- Back-end: PHP, Laravel
- Frond-end: Javascript, JQuery, Laravel
- Database: MySQL

13. E-Tender (LPKN Training Center)

E-Tender is a project developed by by LPKN Training Center for Jasamarga to implement an electronic tendering system (e-tender). The E-Tender platform enables the entire tendering process to be conducted online, from tender announcements and document submissions to

evaluation and selection of tender winners. The project aims to enhance efficiency and transparency in the tendering process. The technology stack used in the development of E-Tender includes :

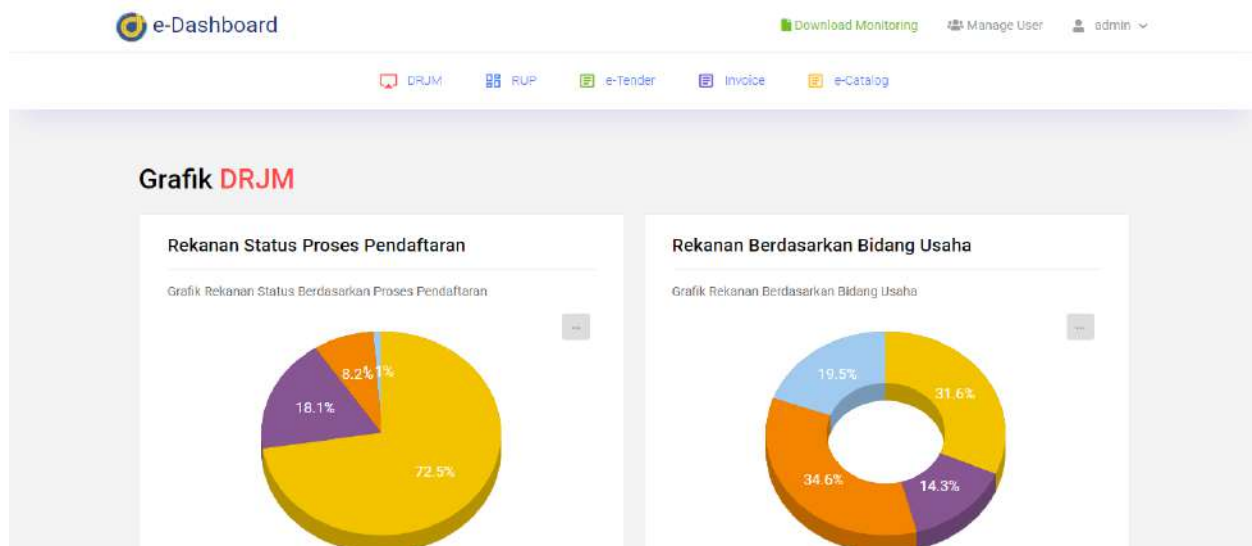

- Back-end: PHP, Laravel
- Frond-end: Javascript, JQuery, Laravel
- Database: MySQL

14.E-Dashboard (LPKN Training Center)

E-Dashboard is a project developed by Jasamarga to create a digital dashboard that consolidates data from three previous applications: Jasamarga Contractor List (DRJM), General Procurement Plan (RUP), and E-Tender. The dashboard aims to provide a comprehensive overview of information related to contractors, procurement processes, and tender execution in a user-friendly interface. E-Dashboard provides interactive data visualization, facilitating effective management and decision-making for Jasamarga. The technology stack used in the development of E-Dashboard includes :

- Back-end: PHP, Laravel
- Frond-end: Javascript, JQuery, Laravel
- Database: MySQL

15. Broadcast Whatsapp (LPKN Training Center)

Whatsapp Broadcast is a project developed to provide a mass communication solution through the Whatsapp platform. This project enables users to send messages in bulk to a specified list of contacts, making it convenient to deliver information or promotions to a target audience efficiently. Leveraging the latest technology, this project ensures fast and accurate message delivery to multiple recipients simultaneously. The technology stack used in the development of Broadcast Whatsapp includes :

- Back-end: PHP, Laravel
- Frond-end: Javascript, React JS
- Database: MySQL
- Integration : API Whatsapp

16. Infopelatihan

Infopelatihan is a marketplace provided by LPKN Training Center. This marketplace is used by training organizers to advertise various types of training, seminars, certifications, and other events. Through Infopelatihan, training organizers can easily promote and sell their courses to prospective participants. The platform facilitates training organizers in expanding the reach and visibility of the trainings they offer, thereby enhancing opportunities for participant engagement. The technology stack used in the development of Infopelatihan includes :

- Back-end: PHP, Laravel
- Frond-end: Javascript, JQuery
- Database: MySQL

17. Sistem Informasi Kepegawaian - Human Resources Information System (Bootcamp Sekolah Programmer)

Sistem Informasi Kepegawaian - Human Resources Information System is a project developed as a final project during the Sekolah Programmer Bootcamp. This project aims to develop a system that facilitates the management of employee data within an organization. The system includes various features such as employee data management, attendance tracking, payroll management, and employment history. The technology stack used in the development of Sistem Informasi Kepegawaian includes :

- Back-end: PHP, Laravel
- Frond-end: Javascript, JQuery
- Database: MySQL
