

ZULKIFLI RAIHAN

Jakarta, Indonesia | +62 85691166309
github.com/zulkifliraihan | zuran2907@gmail.com

OBJECTIVE

Seasoned Full-stack Developer with 5 years of comprehensive experience across diverse industries, demonstrating expertise in both frontend and backend development. Proficient in multiple programming languages and frameworks, with a strong focus on building scalable and efficient applications. Core competencies include PHP (Laravel, CodeIgniter), JavaScript/TypeScript (Node.js, Express.js, Vue.js), and Golang (Gin, Fiber). Experienced in implementing automated testing solutions using Selenium and Cypress frameworks, and well-versed in both SQL and NoSQL database management. Additional expertise includes working with C#, .NET Framework, React.js, and Next.js. Committed to delivering high-quality, maintainable code while staying current with emerging technologies and industry best practices.

SKILLS AND ABILITIES

Programming Languages	: PHP, JavaScript, TypeScript, Golang
Frontend	: Vue.js, React.js, Next.js, jQuery, Tailwind
Backend	: Laravel, CodeIgniter, Symfony, Node.js, Express.js, Nest.js, Adonis.js, Gin, Fiber
Databases	: MySQL, PostgreSQL, Mongo
Testing	: Selenium, Cypress
DevOps	: Git, Ubuntu, cPanel, Nginx, Docker, Azure, DigitalOcean, Google Cloud

EXPERIENCE

Senior Laravel Developer – Innomanic (Clickitfame)

12.2025 – 01.2026

Project Based - Germany

Tech Stack: Laravel, Livewire, MySQL, Google Cloud.

- Refactored and enhanced existing features to improve code quality, maintainability, and overall system performance using Laravel and Livewire.
- Developed new features based on business requirements, ensuring scalability and clean architecture.
- Fixed and optimized the automated payment system integrated with Stripe to ensure reliable and secure transactions.
- Integrated META APIs (Facebook and Instagram) to fetch and process engagement metrics such as likes, comments, views, and other analytics data.

Full Stack Developer – C Channel Indonesia**09.2022 – 12.2025***Full Time - Jakarta, Indonesia*

Tech Stack: Laravel, Express.js, Vue.js, Quasar.js, React.js, Next.js, GraphQL, MySQL, Meilisearch, Minio, DigitalOcean.

- Designed internal and public applications using Laravel, Vue.js, and Quasar.js.
- Collaborated with the central C Channel Japan team to support their product development, utilizing Node.js (Express.js), React.js, Next.js, MySQL, and MongoDB to deliver high-quality features for Japan-based applications.
- Managed and optimized MySQL databases for handling large-scale queries, achieving 30% faster response time.
- Implemented Meilisearch to enhance data search functionality and performance.
- Optimized data export system through query optimization, queue system development, large dataset chunking implementation, progress tracking mechanism, and memory usage optimization.
- Developed authentication and authorization systems using JWT and OAuth2 for application security.
- Integrated social media APIs (Facebook, Instagram, TikTok) to analyze engagement metrics including likes, comments, views, and engagement rates. Reducing manual work by 60%.
- Developed AI-powered automation system using Claude for campaign categorization and tagging based on content and scope of work.
- Implemented payment systems through Xendit payment gateway integration.

Senior Fullstack Developer – SalesPond**08.2025 – 10.2025***Project Based – Australia*

Tech Stack: Laravel, Vue.js, MySQL, Docker, Redis, Meilisearch, Google Cloud

- Developed a SaaS CRM application using microservices architecture with Laravel backend and Vue.js frontend.
- Optimized and accelerated slow SQL queries, particularly on data listing features handling millions of records, reducing execution time by nearly 90% (from 50–110 seconds down to 5–13 seconds).
- Integrated Meilisearch into data listing modules to further enhance retrieval speed and scalability for large datasets.
- Designed and implemented reporting modules, including generating data charts and exporting them into PDF format.

Senior Backend Developer – bundesweit.digital GmbH**09.2024 – 04.2025***Part Time – Germany*

Tech Stack: Laravel, Express.js, Symfony, Gin, MySQL, PostgreSQL, Redis, Docker, Google Cloud, Minio.

- Designed and developed REST APIs using various frameworks including Laravel, Express.js, Symfony, and Gin.

- Implemented comprehensive unit testing using PHPUnit, Pest, and Jest to ensure code quality.
- Managed and optimized MySQL and PostgreSQL databases performance for handling large-scale queries. Reduced query response time by 40% faster response time.
- Implemented microservices architecture to enhance system scalability.
- Developed authentication and authorization systems using JWT for application security.
- Created comprehensive API documentation using Postman, including parameter specifications (required/optional) and data types.
- Integrated social media APIs for automated content publishing to Facebook Page, Instagram, and TikTok.
- Implemented payment systems through Stripe payment gateway integration.
- Managed and optimized cloud storage using Google Cloud and Minio.

Software Developer – PT Arah Environmental Indonesia

08.2022 – 03.2023

Freelance - Jakarta, Indonesia

Tech Stack: Laravel, CodeIgniter, PostgreSQL, Selenium.

- Developed a comprehensive E-Invoice system with automation features for Tax Invoice, E-Stamp, Receipt, Invoice, Document Certificate, Notes, and Official Reports generation with monthly scheduled automation. Reduce manual work by up to 75%.
- Built applications using multiple frameworks using Laravel, CodeIgniter, Express.js.
- Managed and optimized PostgreSQL database focusing on query optimization, database indexing, table partitioning, and query caching for handling large-scale data. Improved database query performance by 60% through optimization and caching implementation.
- Developed an efficient document export and generation system with parallel processing implementation, background queue jobs, batch processing, progress tracking, automated scheduling, and robust error handling.
- Implemented automation testing using Selenium.
- Integrated multiple external APIs with E-Materai Indonesia, Tax Invoice System, Digital Signature.

Technical Lead Developer – Telkom Indonesia

06.2021 – 12.2022

Full Time - Jakarta, Indonesia

Tech Stack: Fiber, Laravel, Express.js, React.js, Next.js, MySQL, PostgreSQL, Mongo, Cypress, Selenium, Docker.

Technical Lead Responsibilities:

- Led a cross-functional team of 3 Developers, 1 QA, and 1 Junior PM focusing on product delivery and quality.
- Developed and standardized PRD (Product Requirements Document) and FRS (Functional Requirements Specification) templates for development guidelines.
- Conducted and managed daily sprint meetings, weekly sprint retrospectives, and monthly performance reviews for team progress monitoring.
- Performed project timeline analysis and planning with team, including resource allocation and risk assessment.

- Implemented rigorous code review system to ensure code quality before staging and production deployment.

Developer Role:

- Designed and developed applications using Fiber, Laravel, and Express.js for backend, along with React.js and Next.js for frontend.
- Implemented comprehensive unit testing using PHPUnit, Pest, and Jest to ensure code quality.
- Managed and optimized multiple databases (MySQL, PostgreSQL, MongoDB) focusing on query optimization, indexing, data replication, sharding strategy, performance tuning, and caching.
- Developed Single Sign-On (SSO) system enabling seamless authentication across multiple applications.
- Designed and implemented automation testing using Cypress and Selenium Framework for end-to-end testing.
- Managed Ubuntu-based cloud infrastructure for staging and production environments, including CI/CD pipeline implementation with GitHub Actions, Nginx load balancer configuration, Docker containerization, SSL/TLS security, automated backup system, and monitoring tools.
- Optimized and maintained WordPress-based landing pages and managed server using cPanel.

Software Engineer – Nawatech

01.2022 – 06.2022

Part Time - Jakarta, Indonesia

Tech Stack: C#, .NET Framework, SQL Server.

- Designed and developed lecturer compensation calculation system for Binus University using C# and .NET Framework with microservices architecture implementation.
- Developed RESTful API with complex compensation calculation features based on teaching hours, academic level, and performance bonuses.
- Managed and optimized SQL Server database focusing on query optimization, stored procedures, indexing, performance tuning, and caching implementation.

IT Programmer – LPKN Training Center

09.2020 – 09.2021

Full Time - Jakarta, Indonesia

Tech Stack: Laravel, CodeIgniter, React.js, Vue.js.

- Developed internal management system using multiple frameworks including Laravel, CodeIgniter for backend and React.js, Vue.js for frontend interface.
- Designed and developed comprehensive E-Procurement system for BUMN Jasamarga including Vendor Management System, General Procurement Planning, E-Dashboard Analytics, and E-Tender Platform.
- Managed and optimized MySQL database with implementation of query optimization, database indexing, table partitioning, replication strategy, backup automation, and performance monitoring for high-traffic applications.

- Managed Ubuntu-based VPS and cPanel infrastructure, including Nginx web server configuration, SSL/TLS security, Supervisor process manager, load balancing, automated backup system, and server monitoring tools.

EDUCATION

STT Terpadu Nurul Fikri – Jakarta, Indonesia

2021 - 2025

Computer Science Degree

Bootcamp Sekolah Programmer – Jakarta, Indonesia

08.2019 - 11.2019

by Nurul Fikri Computer & YBM PLN

COMMUNICATION

- Led and facilitated daily sprint meetings, weekly retrospectives, and monthly performance reviews with cross-functional teams.
- Conducted knowledge sharing sessions and technical training for junior developers.
- Collaborated effectively with international clients and remote teams across different time zones.

LEADERSHIP

- Successfully led a cross-functional team of 5 members (3 Developers, 1 QA, 1 Junior PM) at Telkom Indonesia.
- Implemented standardized development processes and best practices that improved team productivity by 40%.
- Spearheaded the adoption of new technologies and frameworks across multiple projects.

PORTFOLIO

Zulkifli Raihan
<https://github.com/zulkifliraihan>
Fullstack Developer

Projects (Latest – Oldest)

1. Clickitfame (Innomanic)

Clickitfame is a SaaS platform that enables brands and companies to independently discover, manage, and collaborate with influencers, including handling campaign payments through Stripe. The platform supports two main roles: Brand/Company and Influencer. Influencers can register, create a connected Stripe account for payouts, and integrate their Instagram accounts to automatically retrieve engagement metrics and generate rate cards. This allows brands to evaluate influencers based on real data, manage campaigns efficiently, and complete the entire collaboration workflow within a single platform.

- Front-end: Livewire, Laravel
- Back-end: PHP, Laravel
- Database: MySQL
- Integration: Stripe, API META (Facebook & Instagram)

The screenshot shows the Clickitfame influencer dashboard. At the top, it says "Hello Zulkifli, 🌟 You are now logged in as a Influencer". On the left, there's a sidebar with icons for Home, Onboarding, Requests, My Campaigns, Cash out, My Rank (which is highlighted in purple), and Logout. The main area is titled "MY RANK" and displays a timeline of activity points. The timeline shows several entries, each with a timestamp and a green circular icon:

- [C-00000604] 5 points gained for repeated booking from Testbrand4 Firstname 2026-01-12 13:04:39
- [C-00000601] 5 points gained for repeated booking from Testbrand4 Firstname 2026-01-12 13:02:54
- [C-00000600] 5 points gained for repeated booking from Testbrand4 Firstname 2026-01-12 11:12:28
- [C-00000599] 5 points gained for responding to a request very fast 2026-01-12 11:05:02
- [C-00000599] 5 points gained for repeated booking from Testbrand4 Firstname 2026-01-12 10:59:40
- [C-00000598] 5 points gained for repeated booking from Testbrand4 Firstname 2026-01-12 09:52:10
- [C-00000597] 5 points gained for repeated booking from Testbrand4 Firstname 2026-01-12 09:52:09
- [C-00000590] 5 points gained for repeated booking from Testbrand4 Firstname 2026-01-08 19:24:16
- [C-00000589] 2026-01-08 18:59:00

2. Podiem App (SalesPond)

Podiem is a SaaS CRM developed for SalesPond to manage customer data comprehensively, starting from leads acquisition to fully qualified opportunities. The platform supports large-scale data operations, enabling sales teams to efficiently track, filter, and analyze millions of records.

- Front-end: Typescript, Vue.js
- Back-end: PHP, Laravel

- Database: MySQL
- Integration: Redis, Meilisearch

The screenshot shows the Podium Lead Management interface. At the top, there are tabs for Campaigns, Clients, User Management, Reports, Podium Connect, Leads, Rewards, and Intranet. Below the tabs, a navigation bar includes links for All (20344), Presented (16133), Lead Accepted (395), Pending QA (1187), QA Rejected (2379), Lead No Show (212), and Lead Contest (38). There are also filters for Lead Type, Presented Date, Qualified Date, and Appointment Date, along with an 'Assign Leads' button. The main area displays a grid of lead records with columns for Lead Status, Campaign, Presented Date, Lead Owner, Qualified Date, Appointment Date, and Company. Each row contains a checkbox and a preview of the lead details. At the bottom, there is a pagination section showing 0 contacts selected, page numbers 1-5, a dropdown for items per page (set to 20), and a total count of 20357 contacts.

3. Lemon Dashboard (C Channel Japan)

Lemon Dashboard is an internal system dashboard developed for C Channel Japan. It is used by internal teams to manage various operational activities, including campaign management, brand and product listings, and influencer management.

- Front-end: Typescript, Next.js
- Back-end: Typescript, Node.js (Express.js)
- Database: MySQL, Mongo DB
- Integrations: GraphQL, API Meta (Facebook & Instagram), Tiktok, and X (Twitter)

The screenshot shows the Lemon Square brand creation form. On the left, a sidebar lists navigation options: ブランド (selected), キャンペーン, 投稿下書き, 商品管理, 発送管理, ストア管理, 投稿リスト管理, UGCセット管理, Instagram投稿データ取込, インフルエンサー, and 管理者用メニュー. The main form is titled 'ブランド > 作成' (Create Brand) and has several sections: 'ブランド名 (必須)' (Brand Name required) with a note 'ブランド名を入力してください。' (Please enter the brand name.) and a red error message 'ブランド名を入力してください' (Please enter the brand name); 'ブランドロゴ' (Brand Logo) with a note 'キャンペーンページに表示するブランドロゴをアップロードします。正方形の画像をアップロードしてください。推奨されるサイズは1080px x 1080pxです。' (Upload the brand logo to be displayed on the campaign page. Upload a square image. Recommended size is 1080px x 1080px.) and a file selection input; 'Instagramアカウント' (Instagram Account) and 'TikTokアカウント' (TikTok Account) with notes about connecting accounts; and 'X(Twitter)アカウント' (X(Twitter) Account) with a note about connecting accounts. At the bottom, there is a '会社名 (必須)' (Company Name required) field with a note '会社を選択してください。' (Please select the company.) and a dropdown menu showing 'Wolff Group'.

4. Adfinity (bundesweit.digital GmbH)

Adfinity is an advertising service provider for Facebook, Instagram, TikTok, and Google. It offers various ad customizations, such as targeting specific locations, audiences based on gender and age, and more. Users can also integrate their accounts directly with Adfinity for seamless ad management.

- Back-end: PHP, Laravel

- Front-end: Livewire
- Database: MySQL
- Integrations: Google Maps API, Google API, API Meta (Facebook & Instagram), Tiktok

The screenshot shows the 'Unternehmens Dashboard' for 'Cup O' Cake'. Key statistics displayed are: Anzahl Ads (3), Werbebudget (239,98 €), and Templates (5). A map of a regional area is shown with a large red circle overlaid. On the right, a sidebar lists 'Mitarbeiter' (Employees) with checkboxes for Diga Observer (Observer), Robin Recruiter (Teamlead), and Tim Teamlead (Teamlead).

5. Vidfee (bundesweit.digital GmbH)

Vidfee is a video platform where users can review hotels, restaurants, bars, and more. It also offers a business model for hotel, restaurant, and bar owners to subscribe to Vidfee. Business owners can integrate their accounts with Instagram, Facebook Pages, and TikTok to publish or share their videos directly from Vidfee to their respective social media platforms.

- Back-end: Typescript, Node JS (Express.js)
- Front-end: Next.js
- Database: MySQL
- Integrations: Backblaze B2, API Meta (Facebook & Instagram), Tiktok

The screenshot shows the Vidfee homepage. At the top, there's a navigation bar with the logo, links for 'Home', 'Bewertungen suchen' (Search reviews), 'Login', and a button to 'Dein Video hochladen' (Upload your video). Below this is a search bar with the placeholder 'Suche nach dem Namen des Dienstleisters oder nach be...' and a 'Suche' (Search) button. The main heading 'Finde eine Bewertung' is prominently displayed. Below it are category tabs for 'Alle', 'Restaurant', and 'Hotel'. A large promotional section on the left features the text 'Was macht Vidfee besonders und anders' and a subtext about adding video reviews to existing review platforms. To the right, there's a photograph of a restaurant exterior with tables and chairs under umbrellas.

6. Proxxolut (bundesweit.digital GmbH)

Proxxolut is a CRM service specifically designed for the German market.

- Back-end: Typescript, Node JS (Express.js)
- Front-end: React.js
- Database: MySQL

The screenshot shows the Proxxolut CRM interface. On the left, there is a yellow sidebar with various menu items: Todo, Empfehlungssystem (with sub-items: Provisionen, Übersicht, Aktueller Kontostand, Auszahlung), Netzwerk, Kontakte, Salesfunnel, and Admin Events. The 'Empfehlungssystem' section is currently active. On the right, there is a main content area displaying a table of recommendations. The table has columns: ERSTELLT, BETRAG, BESTELLNUMMER, KÄUFER, TYP, and STATUS. There are two entries:

ERSTELLT	BETRAG	BESTELLNUMMER	KÄUFER	TYP	STATUS
01.11.2024 21:24	90,00	I2563	Theodor S.	Unilevel	Bezahlt
15.02.2024 11:38	300,00	II697	Susan S.	Empfehlungsprovision	Bezahlt

Below the table, it says "1 bis 2 von 2 Einträgen". At the top right of the main area, there are buttons for Copy, Excel, CSV, PDF, and a search bar. At the bottom right, there are navigation arrows.

7. The Wedding Jungle (bundesweit.digital GmbH)

The Wedding Jungle is a wedding planning service that covers everything from initial planning, concept development, guest list management, venue selection, budgeting, and various vendor services, including photographers & videographers, music, catering, and more.

- Back-end: PHP
- Front-end: Symfony
- Integrations: Stripe

Hochzeitsplanung leicht gemacht. Die digitale Hochzeitscheckliste von The Wedding Jungle.

Unser Tool ist Euer persönlicher Hochzeitsplaner im Taschenformat, stets griffbereit. Von To-dos über Budgetplanung bis hin zur Gästeliste - wir begleiten euch von Anfang bis Ende auf eurer Hochzeitsreise.

Wir bieten euch wertvolle Tipps, clevere Tricks und die Möglichkeit, unsere erfahrenen Hochzeitsplaner für maßgeschneiderte Unterstützung zu engagieren.

Und jetzt: Lasst eure Hochzeitsreise beginnen - und das Beste ist, die Registrierung ist vollkommen kostenfrei!

8. Infynu (bundesweit.digital GmbH)

Infynu is a company landing page specializing in IT Talent Acquisition (providing IT talent resources). I worked as the Backend Developer, responsible for preparing the content page API in two languages: English and German. Additionally, I implemented the talent search flow based on specific requirements and various tech stacks.

- Back-end: Go, Gin
- Database: MySQL
- Integrations: Google Calender

BRIDGING TALENT AND OPPORTUNITY

With our deep understanding of various industries, we help you to navigate the digital landscape and bring the right expertise to propel your business forward. Let's shape the future together and set new standards for your success and sustainable growth.

9. Atari (C Channel Indonesia)

Atari is an internal dashboard for C Channel Indonesia. This dashboard is used to monitor ongoing campaigns, manage inquiry lists, and create inquiries before launching a campaign. It also allows importing influencers and merging duplicate influencer accounts. In Atari, users can view influencer profiles along with various data, including social media statistics from Instagram, TikTok, and YouTube, as well as campaign performance statistics for each influencer.

- Back-end: PHP, Laravel
- Front-end: Livewire, Tailwind
- Database: MySQL & SQLite
- Integrations: API Tiktok, API Meta (Facebook & Instagram)

	About Personal	About Campaign	Tiktok Username	Tiktok Followers	Tiktok Engagement Rate	Tiktok Avg Video V

10. IRM Lemon APP (C Channel Indonesia)

IRM Lemon is a platform developed by PT. C Channel Indonesia that facilitates brands in promoting their products through influencers who have partnered with C Channel Indonesia. It also allows influencers to engage with brands and endorse products online. Essentially, this

application is quite similar to Neo Lemon & KOL Lemon App, but it incorporates several new features unique to IRM. And The technology stack used in the development of Neo Lemon includes :

- Back-end: PHP, Laravel
- Front-end: Javascript & Typescript, Vue JS
- Database: MySQL
- Integrations: API Meta (Facebook & Instagram), API Tiktok, Payment Gateway, GraphQL, and others

ID	Status	Visibility	SOWs	Reward	Modules	Owner	Created At	Last Update

#1	draft	Public	IG Feed, IG Story	Offering	Drafting	Imam Susanto	7 November 2023	7 November 2023

11. Neo Lemon APP (C Channel Indonesia)

Neo Lemon is a platform developed by **PT. C Channel Indonesia** that helps brands to advertise their products through influencers who have partnered with C Channel Indonesia. The platform offers various ad display packages that can be customized according to the brand's needs, from ad display in video content to promotion through social media. The technology stack used in the development of Neo Lemon includes :

- Back-end: PHP, Laravel
- Front-end: Javascript & Typescript, Vue JS
- Database: MySQL
- Integrations: API Meta (Facebook & Instagram), API Tiktok, Payment Gateway, GraphQL, and others

ID	Tasks	Status	Type	Advertiser	Managed by	Created	Last Update

#1479	Instagram Reels	Ready	Public	B ERL Cosmetics		05 June 2023 (5 days ago)	08 June 2023 (3 days ago)

12. KOL Lemon (C Channel Indonesia)

KOL Lemon is an application that enables influencers to connect with brands and promote products online. The app is developed by **PT. C Channel Indonesia**, a health and fitness company in Indonesia. KOL Lemon makes it easier for influencers to manage their promotional campaigns and provides access to various analytical data that can help them optimize their campaign performance. The technology stack used in the development of KOL Lemon includes :

- Front-end: Javascript & Typescript, Vue JS PWA

13. Chatbot WhatsApp

The Whatsapp Chatbot is an intelligent chatbot platform integrated with Whatsapp to assist admins in efficiently responding to direct messages (DMs) without the need to be online 24/7. This chatbot is equipped with Azure LUIS AI, allowing it to automatically understand and match incoming messages to specific categories or criteria to generate appropriate responses. The technology stack used in the development includes :

- Back-end: Typescript, Node JS (Express JS)
- Integration: Whatsapp Package API, Azure LUIS AI

14. E-Invoice (PT. Arah Environmental Indonesia)

E-Invoice is an electronic invoicing application developed for PT. Arah Environmental Indonesia's internal use. The app is designed to simplify the process of creating and managing invoices electronically. E-Invoice comes with features such as downloading invoices in ZIP or PDF and sending emails to customers along with the e-invoice file to facilitate the payment process. With E-Invoice, businesses can streamline their invoicing processes and reduce the need for manual invoicing. The technology stack used in the development of E-Invoice includes :

- Back-end: PHP, Laravel, Typescript, Node JS (Express JS)
- Front-end: PHP, CodeIgniter (CI), Javascript, JQuery
- Database: PostgreSQL
- Integration: API E-Materai, API Faktur Pajak, and others.

7:   ]
8: }
  
```

15. Chatbot Instagram

The Instagram Chatbot is an intelligent chatbot platform integrated with Instagram to assist admins in efficiently responding to direct messages (DMs) without the need to be online 24/7. This chatbot is equipped with Azure LUIS AI, allowing it to automatically understand and match incoming messages to specific categories or criteria to generate appropriate responses. The technology stack used in the development of Pesantren Hub includes :

- Back-end: Javascript, Node JS (Express JS)
- Integration: Instagram Package API, Azure LUIS AI

How to apply in this university?

Just login to

apply/ and follow the simple step below:

- Fill in the online application form
- Submit scan/copy of your last one year transcript (semester 1&2 report card of your last grade)
- Pay IDR 500,000 application fee (non-refundable)
- Schedule your Placement Test
- Take our English & Math entrance test:
 - a. 1st test - Basic Skill Test (English Reading, Writing, Listening)
 - b. 2nd test - Advanced Skill Test (English Reading, Writing, Mathematic)

Can I get the faculty information?

In the [redacted] university, we have 3 faculty, such as:

1. Faculty of Business (FoB)
 - Entrepreneurship
 - Banking & Finance
 - Digital Marketing
 - Accounting
2. Faculty of Engineering and Technology (FET)
 - Mechanical Engineering
 - Industrial Engineering
 - Visual Communication Design
 - Computer Science / (Electrical and Computer Engineering)
 - Information Systems
3. Faculty of Education (FOE)
 - English Language Education
 - Mathematics Education

Double degree with Arizona University is available for Faculty of Engineering and Technology: Mechanical Engineering, Industrial Engineering, Computer Science / Electrical Computer Engineering, and Information System / Applied Computing. Then, for Faculty of Business is available only for Management.

16. Pesantren Hub (Telkom Indonesia)

Pesantren Hub is a powerful backend application developed to provide a centralized hub for all pesantren-related information. The app is designed to be a reliable and efficient solution for users to find the information they need for each pesantren, making it a central source for pesantren-related information. To achieve this, Pesantren Hub is integrated with various databases, including the Ministry of Religious Affairs' and Telkom Indonesia's databases, enabling it to map and locate pesantren throughout Indonesia. This integration allows the app to provide complete and accurate pesantren information for users. The technology stack used in the development of Pesantren Hub includes :

- Back-end: Go, Fiber
- Database: PosgresSQL
- Integration: Database Ministry of Religious Affairs Indonesia

17. Store PGD (Telkom Indonesia)

Store PGD is a platform developed by Telkom Indonesia for pesantren (Islamic boarding schools) that face various challenges. This platform serves as a solution to address their specific issues. For example, it provides Internet connectivity solutions through services like Indihome or Orbit. The technology stack used in the development of Store PGD includes :

- Back-end: PHP, Laravel
- Front-end: Javascript, JQuery, Laravel
- Database: MySQL

18. Website Builder (Telkom Indonesia)

Website Builder is a platform provided by Telkom Indonesia to offer a solution for pesantren (Islamic boarding schools) to easily create their own websites without the need for coding. This project can be considered as a simplified version of WordPress, enabling users to quickly build websites without hassle. The technology stack used in the development of Website Builder includes :

- Back-end: PHP, Laravel
- Front-end: Javascript, Next JS
- Database: MySQL

19.Binus Honor

Binus Honor is an application developed by Nawatech for Binus University. This application is specifically designed to manage the honorarium of the university's lecturers, the lecturer attendance system, and other internal aspects. Through Binus Honor, lecturers can easily submit honorarium requests, manage attendance, and access information regarding honor payments. The application accelerates administrative processes, enhances transparency, and improves efficiency in managing lecturer honorarium at Binus University. The technology stack used in the development of Binus Honor includes :

- Back-end: C#, .NET Core
- Front-end: Javascript, JQuery
- Database: MySQL
- Integration : API Internal Binus University

20.Daftar Rekanan Jasamarga / Jasamarga Contractor List - DRJM (LPKN Training Center)

Daftar Rekanan Jasamarga / Jasamarga Contractor List (DRJM) is a project developed by LPKN Training Center for Jasamarga to create and manage a database of contractors or business partners collaborating with the company. DRJM serves as a system that records and manages information related to contractors, such as company data, qualifications, work experience, and their availability to participate in Jasamarga projects. This system helps Jasamarga in selecting and establishing effective partnerships with high-quality contractors. The technology stack used in the development of DRJM includes :

- Back-end: PHP, Laravel
- Front-end: Javascript, JQuery, Laravel
- Database: MySQL

21. Rencana Umum Pengadaan – RUP (LPKN Training Center)

The General Procurement Plan (RUP) is a project developed by LPKN Training Center for Jasamarga. The project aims to implement an e-procurement system for Jasamarga, providing an efficient and transparent process for the procurement of goods and services. Enabling the vendors to access tender information, submit bids, and facilitate the entire procurement process online. The technology stack used in the development of RUP includes :

- Back-end: PHP, Laravel
- Front-end: Javascript, JQuery, Laravel
- Database: MySQL

The screenshot shows the Jasamarga RUP system interface. At the top, there's a navigation bar with the Jasamarga logo, the text "Rencana Umum Pengadaan (RUP) v1.0", and a "Masuk" button. Below the navigation is a menu bar with categories: "Barang", "Jasa Konsultansi", "Jasa Lainnya", and "Pekerjaan Konstruksi". The main content area displays a table of procurement items. The table has columns for "No.", "Nama Paket", "Jenis Pengadaan", "PDN", "Waktu Pemilihan", and "Pagu Anggaran (Rp)". There are 5 entries shown:

No.	Nama Paket	Jenis Pengadaan	PDN	Waktu Pemilihan	Pagu Anggaran (Rp)
1	Pengadaan Jasa Lain Pengoperasian dan Perbaikan...	Jasa Lainnya	Ya	Desember 2020	10.232.274.780
2	Layanan Internet Kantor Pusat dan Koneksinya...	Jasa Lainnya	Ya	Desember 2020	190.000.000
3	PENGADAAN JASA PENGELOLAAN MEDIA CENTER...	Jasa Lainnya	Ya	Januari 2021	1.234.000.000
4	PENGADAAN JASA PRODUKSI KONTEN KOMUNIKASI...	Jasa Lainnya	Ya	Januari 2021	1.500.000.000
5	PENGADAAN JASA LAIN (LAYANAN INTERNET KAN...	Jasa Lainnya	Ya	Januari 2021	160.000.000

At the bottom left, it says "Menampilkan 1 sampai 5 dari 61 entri". At the bottom right, there are buttons for "Sebelumnya" and "Selanjutnya". The footer includes copyright information: "Copyright © 2021 PT Jasamarga (Persero) Tbk. All rights reserved." and "RENCANA UMUM PENGADAAN (RUP) v1.0.0".

22. E-Tender (LPKN Training Center)

E-Tender is a project developed by LPKN Training Center for Jasamarga to implement an electronic tendering system (e-tender). The E-Tender platform enables the entire tendering process to be conducted online, from tender announcements and document submissions to evaluation and selection of tender winners. The project aims to enhance efficiency and

transparency in the tendering process. The technology stack used in the development of E-Tender includes :

- Back-end: PHP, Laravel
- Front-end: Javascript, JQuery, Laravel
- Database: MySQL

The screenshot shows the e-Tender application's user interface. At the top, there is a header with the JASAMARGA logo and a login link. Below the header, a message says "Selamat Datang Di Aplikasi e-Tender". The main content area is a table listing a single tender entry:

ID Tender	Nama Tender	Tanggal Pelaksanaan
TI.090321.1	Paket testing 9 Maret untuk user PB Jenis Pengadaan : Barang Lokasi : Kantor Pusat Jasamarga HPS : 2.753.835.415,20	09 Mar 2021 11:46 s.d 19 Mar 2022 11:46

At the bottom of the table, it says "Showing 1 to 1 of 1 entries". There are navigation buttons for "Previous", "1", and "Next".

e-Procurement © 2020 PT Jasa Marga (PERSERO) Tbk.

23. E-Dashboard (LPKN Training Center)

E-Dashboard is a project developed by Jasamarga to create a digital dashboard that consolidates data from three previous applications: Jasamarga Contractor List (DRJM), General Procurement Plan (RUP), and E-Tender. The dashboard aims to provide a comprehensive overview of information related to contractors, procurement processes, and tender execution in a user-friendly interface. E-Dashboard provides interactive data visualization, facilitating effective management and decision-making for Jasamarga. The technology stack used in the development of E-Dashboard includes :

- Back-end: PHP, Laravel
- Front-end: Javascript, JQuery, Laravel
- Database: MySQL

The screenshot shows the e-Dashboard application's user interface. At the top, there is a header with the e-Dashboard logo and links for Download Monitoring, Manage User, and admin. Below the header, there are navigation tabs: DRJM, RUP, e-Tender, Invoice, and e-Catalog. The main content area features two donut charts:

Grafik DRJM

Rekanan Status Proses Pendaftaran

Status	Persentase
Selesai	72.5%
Dalam Pengerjaan	18.1%
Ditolak	8.2%
Belum Dimulai	1.1%

Rekanan Berdasarkan Bidang Usaha

Bidang Usaha	Persentase
A	31.6%
B	34.6%
C	14.3%
D	19.5%

24. Broadcast Whatsapp (LPKN Training Center)

Whatsapp Broadcast is a project developed to provide a mass communication solution through the Whatsapp platform. This project enables users to send messages in bulk to a specified list of contacts, making it convenient to deliver information or promotions to a target audience efficiently. Leveraging the latest technology, this project ensures fast and accurate message delivery to multiple recipients simultaneously. The technology stack used in the development of Broadcast Whatsapp includes :

- Back-end: PHP, Laravel
- Front-end: Javascript, React JS
- Database: MySQL
- Integration : API Whatsapp

The screenshot shows the 'Room Data' creation form. It includes fields for 'Instance required' (set to 'Infopelatihanid'), 'Room Name required' (set to 'Tester'), an optional 'Image (optional)' field with a 'Choose file' button and 'Browse' button, and a large 'Message Text required' area. A 'Submit' button is at the bottom. Below the form is a search bar and an 'Excel Data' section with a 'Choose file' button, 'Browse' button, and a blue 'Upload' button. On the left, a sidebar menu lists 'BOARD' (Dashboard), 'BROADCASTER' (Whatsapp, highlighted in purple), and 'ADMIN' (Users, Roles, Instance).

25. Infopelatihan

Infopelatihan is a marketplace provided by LPKN Training Center. This marketplace is used by training organizers to advertise various types of training, seminars, certifications, and other events. Through Infopelatihan, training organizers can easily promote and sell their courses to prospective participants. The platform facilitates training organizers in expanding the reach and visibility of the trainings they offer, thereby enhancing opportunities for participant engagement.

The technology stack used in the development of Infopelatihan includes :

- Back-end: PHP, Laravel
- Front-end: Javascript, JQuery
- Database: MySQL

26. Sistem Informasi Kepegawaian - Human Resources Information System (Bootcamp Sekolah Programmer)

Sistem Informasi Kepegawaian - Human Resources Information System is a project developed as a final project during the Sekolah Programmer Bootcamp. This project aims to develop a system that facilitates the management of employee data within an organization. The system includes various features such as employee data management, attendance tracking, payroll management, and employment history. The technology stack used in the development of Sistem Informasi Kepegawaian includes :

- Back-end: PHP, Laravel
- Front-end: Javascript, JQuery
- Database: MySQL
